

THE MONIFA METHOD

The Zero-Overhead Launch Toolkit

*How to build a real business with one AI tool,
no team, and under £75/month in costs.*

Free Download · themonifamethod.com

The Zero-Overhead Promise

Here is what most business advice gets wrong: it assumes you need money to make money. An office. A team. A designer. A developer. A copywriter. A marketing budget.

What if you needed none of those things?

This toolkit shows you the exact model used to build The Monifa Method — a faceless digital education business running on:

Tool	What it does	Monthly cost
Claude (Anthropic)	Scripting, strategy, copy, systems, research	~£18
HeyGen	AI avatar video production	~£24
Course platform	Delivery + checkout	~£29
TOTAL		Under £75/month

No team. No agency. No office. Net margin: 90%+.

That is not a projection. That is the actual number.

The 3-Question Business Filter

Before you build anything, run your idea through these three questions.

QUESTION 01

Is someone already paying for this?

If yes — there is demand. If no — you are guessing. Check: are there competitors? Are people searching for it? Are communities asking about it? If the answer to all three is no, refine the idea.

QUESTION 02

Can I deliver it without burning out?

If it requires your daily presence to function — it is a job, not a business. The model needs to work when you are not in the room. If it cannot, restructure it until it can.

QUESTION 03

Can Claude handle 80% of the operational work?

If yes — your overhead stays near zero. If no — you will need to hire, which changes the economics entirely. The zero-overhead model works specifically because AI handles the operational layer.

If your idea passes all three — move to the next page.

If it fails any of them — refine it until it passes, or choose a different idea.

5 Zero-Overhead Business Models

Each one runs on Claude + 1-2 platforms. Each can be started this weekend.

01 — THE FACELESS COURSE STUDIO

Teach what you know using AI avatars. No camera, no studio. Claude scripts it, HeyGen delivers it, your platform sells it. This is the model The Monifa Method runs on.

02 — THE PREMIUM NEWSLETTER

Curate and analyse for a specific niche. Claude handles research and first drafts. You handle editorial judgement and voice. 500 subscribers at £8/month = £4,000/month.

03 — THE NICHE DATABASE

Organise scattered information into a searchable, subscription-based resource. Claude compiles and structures the data. You provide the niche expertise that makes it useful.

04 — AI-POWERED CONSULTING

Your expertise + Claude's operational layer. Research, reports, presentations, modelling — Claude handles 80% of the analytical work. You handle the judgement and client relationships.

05 — THE FACELESS CONTENT BRAND

Build an audience through faceless content. Sell the implementation layer — workbooks, templates, practice tools. YouTube distributes for free. Claude produces everything operational.

Your Weekend Launch Plan

SATURDAY

- **Morning:** Choose your model. Run it through the 3-question filter.
- **Afternoon:** Use Claude to build your MVP — the minimum version that delivers one clear result. Not the complete version. The useful version.

SUNDAY

- **Morning:** Set up delivery — one payment link, one landing page, one email.
- **Afternoon:** Launch to 10 people you already know. Not cold traffic. Warm connections. The email list, the community, the direct messages.

MONDAY

- **Check:** Did anyone buy? Did anyone respond? What did they say?
- That data is worth more than six months of planning.

The first version is market research. The second version is informed. Launch the first one.

The 3 Claude Prompts That Built This Business

Copy, paste, customise. These are real prompts — not generic templates.

PROMPT 01 — THE BUSINESS IDEA VALIDATOR

"I want to build [describe your idea]. Can you help me assess whether there is real demand for this? Look at: what people are already paying for in this space, what gaps exist that nobody is filling well, and whether one person could deliver this using AI tools for 80% of the operational work. Be honest — tell me if this idea has structural problems."

PROMPT 02 — THE MVP BUILDER

"I need to build the simplest possible version of [your product]. The version that delivers one clear result for one specific person. Help me identify: what to include, what to cut, and how to structure it so I can build it in one day. Do not make it comprehensive — make it useful."

PROMPT 03 — THE SALES PAGE WRITER

"Write a simple, honest sales page for [your product]. The buyer is [describe her]. She needs to understand: what this is, who it is for, what changes as a result, and what it costs. No hype. No urgency tactics. Just clarity. Use British English."

The Proof

- This toolkit was written using Claude.
- This channel is scripted using Claude.
- The website at themonifamethod.com was built in a single Claude conversation.
- The AI practice coach (Ask Muse) was built in the same conversation.
- Every course on the channel was scripted, structured, and produced by one person.
- The 7-pillar course system, all companion workbooks, and the full marketing strategy were built across two sessions.

Total team size:	1
Monthly overhead:	Under £75
Net margin:	90%+
Tools used:	Claude, HeyGen, LearnWorlds

That is the zero-overhead model. It works.
