

The CFO Pricing Card

Price with your head, not your fear

The 3-Part Framework

Your price sits between three numbers. Most women price at the floor because they've never calculated the ceiling.

The Floor

Your actual costs and time, valued honestly. The number below which you're paying to work.

Floor: £_____

The Market Position

What 3-5 comparable offers charge. Not identical — comparable.

Market range: £_____ to £_____

The Ceiling

What the outcome is genuinely worth to the person paying for it. Most people never calculate this.

Ceiling: £_____

The Discount Pause

Next time you're tempted to discount before anyone's objected — pause. Let the silence sit. It's far less catastrophic than it feels.

Your price is a signal, not an apology.
