

The Faceless Course Starter Kit

Teach what you know without ever appearing on camera

The 4 Decisions

1. Stock avatar or custom?

Stock is instant and free with most plans. Custom (built from your photo) costs more but feels more personally yours.

2. How many lessons?

5 lessons for a focused mini-course. 8-11 for something more comprehensive. Start smaller than feels comfortable.

3. Script or bullet points?

A full script produces the most natural delivery. Bullet points are faster but can sound stilted — test both.

4. Where does it live?

A course platform for structure and progress tracking, or a simple page with sequential video links for speed.

Your First Lesson Outline
